ECLIL European project building CLIL resources for language learning

E-CLIL Overview

Written by Administrator

E-CLIL is European Union funded project to develop and build resources and a resource centre for the use of Content Language Integrated Learning (CLIL) see CLIL (http://www.teachingenglish.org.uk/think/articles/content-language-integrated-learning)

It focuses on language learning, learning strategies, multilingualism and multiculturalism. CLIL is dual-focused instruction during which language is taught at the same time as content from a different school subject. It has already been established as a valuable approach to both teaching foreign languages and specific subjects.

The project is being completed over 3 years and includes partners with a wide-experience of how to create CLIL content and the issues around CLIL.

THEMES - CONTENT AND LANGUAGE INTEGRATED LEARNING

Content and Language Integrated Learning (CLIL)

Content and Language Integrated Learning (CLIL) and bilingual education are increasingly popular across Europe. The ECML supports CLIL teachers and teacher trainers not only to take account of and strengthen the language component in subject learning but to focus on the development of cognitive and academic literacies.

ECML PROGRAMME 2012-2015

Language skills for successful subject learning

CEFR linked descriptors for mathematics and history/civics

language descriptors

These resources highlight challenges for young learners in subject classes where the language of instruction is not their first language. The focus is on minimum language standards in history/civics and mathematics for learners aged 12/13 and 15/16. The language descriptors are linked to CEFR levels A2, B1 and B2 and available in six languages.

Introduction

The traditional view is that language is only important in language lessons. Today however, language is no longer seen as a goal in itself, but also as a tool through which students interact with friends and peers in schools, and through which they learn content matters in subjects like science, geography, history and mathematics.

LANGUAGE DESCRIPTORS 2 PROJECT WEBSITE 2016-2019

The project *Developing language awareness in subject classes* is carried out as a follow-up to this publication in the ECML's programme 2016-2019.

Crickweb - free online education resources & games

Home | Early Years | Key Stage 1 | Key Stage 2 | Extras | Fun Games | Links | FAQs | News

265 free educational interactive teaching resources and activities for Primary/Elementary Schools.

84 free to use fun kids games/activities for kids aged 4 - 11.

170 plus links to free interactive teaching activities, educational games, image and software resources.

Suitable for use on an IWB, PC or Mac at school.

Also for teachers, parents & children at home with a PC or Mac.

Online educational learning games and activities for Foundation Stage, Key Stage 1, Key Stage 2, Kindergarten and Elementary schools.

Subjects including:
Maths, English, Science, History, Geography, R.E., D.T., I.C.T, French and Spanish.

Moving and growing

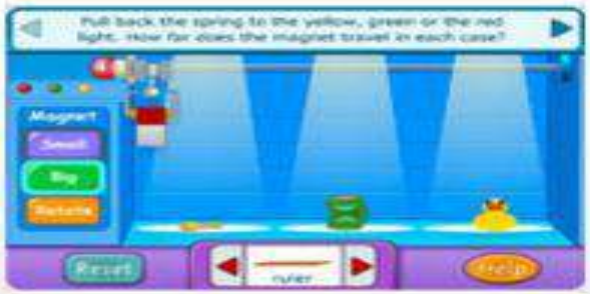
Finding out how you move and grow. Can you label the human skeleton? When you've finished move onto the animal skeletons.

© bbc.co.uk

Variation - Grouping

Do you know which groups living things belong to? Look at the plants and animals as they go past. Can you drag them into the correct groups?

© bbc.co.uk



Magnets and Springs

Magnets have north poles and south poles. These attract each other. But two north poles will repel each other, as will two south poles.
When a spring is stretched or squashed, it creates a force.

© iboard.co.uk

Toys, Past and Present - Listen and Read

A simple, non-fiction, interactive information book. Contains information about toys, past and present. Pupils can either listen to or read the text. The links in the text will navigate to other pages containing related items.

© iboard.co.uk

Classroom Museum

A simple sorting activity. Decide on your criteria and enter it onto the desk labels. Find toys that match your set titles..

© 3913.co.uk

Word Cruncher - History

A timed interactive History spelling game. Find and select the letters in the correct order to make the word. If you choose the wrong letter you have to start that word again.

MOTION | HEAT & THERMODYNAMICS | ELECTRICITY & MAGNETISM

| LIGHT | MODERN PHYSICS

Mechanics and Motion

Motion is one of the key topics in physics. Everything in the universe moves. It might only be a small amount of movement and very very slow, but movement does happen. Don't forget that even if you appear to be standing still, the Earth is moving around the Sun, and the Sun is moving around our galaxy. The movement never stops. Motion is one part of what physicists call **mechanics**. Over the years, scientists have discovered several rules or **laws** that explain motion and the causes of changes in motion. There are also special laws when you reach the **speed of light** or when physicists look at very small things like atoms.

PHYSICS STUDIES MANY DIFFERENT TYPES OF MOTION AND FORCES.

Nice activities, but what shall I do when the following annoying message pops up on my tablet or smartphone screen?

A JUNGLE OF EDUCATIONAL APPS…

How to deal with apps

There are hundreds of educational apps online:

- first of all see if they work on Android or i-Pad devices or on both

- then choose the free ones or buy only those that are really effective (better if they are cheap)

This app is designed for both iPhone and iPad

Free

Category: Education
Updated: Dec 03, 2015
Version: 2.04
Size: 53.6 MB
Language: English
Seller: PRESCHOOL UNIVERSITY

Description

Learn The Alphabetic Principle.
Develop Phonemic Awareness.
Learn How Sounds Relate to Words.
Learn Letter-Sound Correspondence.
Learn How to APPLY Letter Sound Correspondence.
Gain proficiency in the use of the sounds of the letters.
Gain Proficiency with Auditory Discrimination.

This app has features and components necessary to give your child strong phonemic awareness. This app has features and components necessary to give your child strong letter awareness. This app will start your child off on the path to reading success. This game is part of the ABC MAGIC PHONICS series. We recommend the other ABC MAGIC apps as a means to expand and reinforce your child's phonemic awareness and letter awareness.

This app has 3 levels of sequential learning for English learners to master. The sequence is designed to take the learner from the concrete to the abstract; from not knowing anything about letters to having good phonemic awareness. The app starts with using sounds and finishes with the letter symbols for both lowercase and uppercase letters. This has 3 lessons that each focus on a particular step of the Alphabetic Principle.

Lesson 1. Sounds to Images
Lesson 2. Sounds to Lowercase Letters
Lesson 3. Lowercase Letters to Images

Introducing a fun, interactive game for you and your preschooler from The Good Night Show on Sprout.

Your preschooler can practice their bedtime routine with Sprout's lovable character, Star. Brush Star's teeth, wash Star's face, read a Sprouterrific story to Star and get him ready for bed. Then your Sproutlet can gently rock Star to sleep. You can also sing along to your favorite Good Night Show songs like Brusha Brusha and Twinkle Twinkle.

Watch The Good Night Show, every night from 6PM- 9PM ET, only on Sprout.

KinderTown Review

BrainPOP Jr. uses cartoon style movies, quizzes and facts to teach in a very child-friendly way. This app tackles difficult concepts like bullying, bar graphs and U.S. history, unlike most other educational apps. It is wonderful for sparking curiosity introducing kids to Science, Social Studies, Math, Language and so much more. Free content is available but a subscription to BrainPOP will give you access to many more videos. Each video is followed by an easy or hard quiz that we encourage parents to join in, as reading is needed. It is a good way to see what your child has learned.

Peekaboo Kids

The Water Cycle | The Dr. Binocs Show | Learn Videos For Kids

Hey, stop! Don’t you think kids are spending too much time on smartphones and tablets?

In medio stat virtus

It’s not all doom and gloom!

1. **Establish screen time rules**
2. **If necessary, use apps to limit screen time for kids… *crazy, thing, isn’t it?* (www.screenlimit.net)**
3. **Balance screen-time activities with other healthy activities**
4. **As a teacher/parent be a role model: from time to time stop using your device and communicate with kids face to face.**

All in all… this is what kids need:

Thank you for your (patient) attention!
